Veil Avayde

S M L XL XXL 3XL 4XL

Description

The Highball Windpro Sweater is designed for waterfowl hunting where protection from the elements is key. The sweater is water resistant and 100% windproof thanks to the GORE-TEX Infinium Softshell, it also has a grid fleece lining for added warmth.

Constructed in GORE-TEX Infinium Softshell makes this jacket 100% windproof and water resistant. For additional warmth, the inside is a grid fleece lining. To allow for greater mobility the under arm is GORE-TEX Stretch. Abrasion resistant inserts on the arms are added for durability. To complete the sweater it is constructed with a high back collar designed to protect hunters against back wind. This sweater is available in Veil Avayde™, an advanced Waterfowl Concealment Camo designed for reeds and marshes.
